Moral Foundations theory is a psychological theory that seeks to explain why moralities differ, but still share fundamental characteristics. It was first outlined by psychologist Jonathan Haidt. The theory proposes that each one of us comes equipped with what he calls an 'intuitive ethics', which is an innate capacity to feel flashes of approval or disapproval towards certain patterns of human behaviour.

The foundation of morals and ethics are guides to human behavior stemming from our intrinsic disposition as social creatures. Morals are defined as "social elements that tend to have greater social value in accordance with standards of right and wrong" and ethics as the "study of problems which seeks to discover how one ought to act" (PhilosophyLander Edu).
