CANopen connectivity

CANopen is a CAN based communication protocol. The CANopen standard is useful as it enables off-the-shelf interoperability between devices (nodes) in e.g. industrial machinery.

Further, it provides standard methods for configuring devices - also after installation.

CANopen was originally

Download File

Anybus Communicator -
CANopen

The X-gateway's primary function is fast transfer of cyclic I/O data between the two networks. I/O data from the PROFINET network is written into CANopen objects that can be mapped into CANopen PDOs and vice versa.

The gateway acts as a full Master/Manager on the
