Chess: 5334 Problems, Combinations and GamesBy **L** ◆ **szl** ◆ **P**olg ◆

Susan Polgar became the first female Grandmaster at age 15—and it wasn't luck that got her there. Her use of tactics, combinations, and strategy during her games gave her the critical advantage she needed against her opponents. InChess Tactics for Champions, Polgar gives insight into the kind of thinking that chess champions rely on while playing the game, specifically the ability to recognize patterns and combinations. With coauthor Paul Truong, Susan Polgar teaches the tactics she learned from her father, Laszlo Polgar, one of the world's best chess coaches. [] Teaches players how to calculate the effect of a move in order to gain an edge over an opponent [] For intermediate to advanced chess players of all ages

A uniform treatment of the four protease groups and a discussion of the differences and similarities in their action is presented in this important new publication. Serine, cysteine, aspartate, and zinc proteases are systematically discussed by nomenclature, evolution, specificity and their regulatory role. The chemistry of the peptide bond, including the catalysis of ester and peptide hydrolyses, is explained. For each protease group the emphasis is placed on the structure and function. Kinetics, enzyme modifications, isotope effects, subzero temperature investigations, nuclear magnetic resonance measurements, X-ray diffraction data, binding of transition-state analogs, zymogen activation, and site-specific mutagenesis are combined to rationalize the action of proteases. Both natural and synthetic inhibitors are considered because of their importance in mechanistic studies and drug design.

Winning Chess the Polgar Way! In A World Champion's Guide to Chess, Women's World Champion Susan Polgar's exclusive training methods will have you playing winning chess! Topics include Chess Essentials, Tactics, Strategy, Pattern Recognition, Endgames, Chess Etiquette, Advice for Parents & Coaches and much more! SUSAN POLGAR is a winner of four Women's World Championships and the top-ranked woman chess player in the United States. She became the #1 woman player in the world at 15 and remained in the top 3 for over 20 years. In 2013, she received the U.S. Coach of the Year Award and the following year, she was named the Chess Trainer of the Year by the International Chess Federation (FIDE). She thus became the first person in history to be accorded both honors. Under her guidance, SPICE chess teams at both Texas Tech University and Webster University have won a combined five consecutive National Division I Collegiate Chess Championships. PAUL TRUONG is winner of eleven national titles, a prolific chess trainer, and award-winning chess author. He was also captain and manager of the historic 2004 US Women's Olympiad team which won two gold and two silver medals, as well as the coach of the five-time national champion SPICE chess teams. Grandmaster Alexander Panchenko (1953-2009) was one of the most successful chess trainers in the Soviet Union, and later in Russia. Panchenko ran a legendary chess school that specialised in turning promising players into masters. The secret of his success were his dedication and enthusiasm as a teacher combined with his outstanding training materials. 'Pancha' provided his pupils with systematic knowledge, deep understanding and the ability to take practical decisions. Now, Panchenko's classic Mastering Chess Middlegames is for the first time available in translation, giving club-players around the world access to this unique training method. The book contains a collection of inspiring lessons on the most important middlegame topics: attack, defence, counterplay, realising the advantage, obstructing the plans of your opponent, the battle of the heavy pieces, and much more. In each chapter, Panchenko clearly identifies the various aspects of the topic, formulates easy-to-grasp rules, presents a large number of well-chosen examples and ends with a wealth of practical tests. The brilliance of Alexander Panchenko's didactic method shines through in this book. It is hard to give better advice for ambitious chess players than to follow this tried-and-tested and highly instructive road towards mastering the chess middlegame.

Domination in 2,545 Endgame Studies was originally published in the Soviet Union. It is a collection of endgames, mostly composed by a wide variety of Soviet composers, based on a common theme, that a normally weaker piece is able to trap a stronger piece.

The three-times World Chess Solving Champion distils the most useful middlegame concepts and knowledge into 100 lessons that everyone can understand. Following on from his successful Understanding Chess Endgames, John Nunn turns his attention to the middlegame - the phase of the chess battle where most games are decided, yet the one that has received the least systematic treatment from chess writers. With the outstanding clarity for which he is famous, Nunn breaks down complex problems into bite-sized pieces. In the case of attacking play, we are shown how to decide where to attack, and the specific methods that can be used to pursue the enemy king. Positional play is described in terms of the major structural issues, and how the pieces work around and with the pawns. Nunn explains how to assess when certain pieces are better than others, and how we can make use of this understanding at the board. Readers will never be short of a plan, whatever type of position arises. Each lesson features two inspiring examples from modern chess, annotated honestly and with a keen focus on the main instructive points. Both sides' ideas are emphasized, so we get a clear picture of the ways to disrupt typical plans as well as how to form them.

Raise your chess to the next level with this program of 600 instructive and challenging exercises covering all aspects of the game. This book will sharpen your tactical vision, deepen your positional understanding, and enrich your knowledge of theoretical positions. It will also strengthen your analytical skills, and instill a sound move selection process. Win more games and increase your enjoyment of chess!

"Notions of chess have been shattered by a teen-age Hungarian girl - some call her modest and soft-spoken, but many opponents know her as a ferocious tiger over the board - who after years of steady progress began breathing down the necks of the top men and now has broken the barrier of one of the worlds most exclusive clubs: she has earned the rank of grandmaster at 15 years, 5 months, one month younger than Bobby Fischer when he did it 34 years ago." New York Times, 1992
Great achievements often take a lifetime of preparation, but when these achievements are becoming the World Number 1 woman chess player at the age of 12 and the youngest ever grandmaster at the age of 15 you have to start early! In this very personal book Judit Polgar describes her early moments of success and the chess ideas she needed to master to achieve them. This exceptional book is the beginning of a unique project where one of the greatest players of our time transforms her personal journey to the top into a roadmap for everyone who ever wanted to better themselves in the game of chess.
