Science With Python By  
6.0001 Introduction to Computer  
Science and Programming in Python is  
intended for students with little or no  
programming experience. It aims to  
provide students with an  
understanding of the role computation  
can play in solving problems and to  
help students, regardless of their  
major, feel justifiably confident of their  
ability to write small programs that  
allow them to accomplish useful goals.~~

## ~~Introduction to Computer Science and Programming in Python ...~~

Course description This course is an introduction to computer science for students without prior programming experience. We explore problem-solving methods and algorithm development using the high-level programming languages Python and Scratch. Python is a language with a simple syntax, and a powerful set of libraries.

have chosen to focus on breadth rather than depth.

### ~~Introduction to Computer Science and Programming Using Python~~

This Computer science and programming using python course will introduce you to the fundamental ideas in computing and teach you to read and write your own computer programs. Computer science is about how to solve problems, like building a search engine, by breaking them into smaller pieces and then precisely and mechanically describing a sequence of steps that you can use to solve each piece.

Computer Science (PHP & Python  
Projects) Research Topics. Computer  
Science (PHP & Python Projects) is  
the study of computers and  
computational systems. Unlike  
electrical and computer engineers,  
computer scientists deal mostly with  
software and software systems; this  
includes their theory, design,  
development, and application.
