Dax Formulas For Powerpivot A
A measure is a formula that is created specifically for use in a PivotTable (or PivotChart) that uses Power Pivot data. Measures can be based on standard aggregation functions, such as COUNT or SUM, or you can define your own formula by using DAX. A measure is used in the Values area of a PivotTable.

Data Analysis Expressions (DAX) in Power Pivot -

Where To Download Dax Formulas For Powerpivot A Simple To The Excel Revolution

Power Pivot provides Data Analysis Expressions (DAX) for creating custom calculations in Power Pivot tables and in Excel PivotTables. DAX includes some of the functions that are used in Excel formulas, and additional functions that are designed to work with relational data and perform dynamic aggregation. Here are some basic formulas that could be used in a calculated column:
