Pendragon Press is proud to offer this new, revised, and expanded edition of Formalized Music, Iannis Xenakis's landmark book of 1971. In addition to three totally new chapters examining recent breakthroughs in music theory, two original computer programs illustrating the actual realization of newly proposed methods of composition, and an appendix of the very latest developments of stochastic synthesis as an invitation to future exploration, Xenakis offers a very critical self-examination of his theoretical propositions and artistic output of the past thirty-five years. This edition of Formalized Music is an essential tool for understanding the man and the thought processes of one of this century's most important and revolutionary musical figures.

This reference book, now in its fourth edition, offers a comprehensive introduction to electrical engineering design with EPLAN Electric P8. Based on Version 2.5 of EPLAN Electric P8, this handbook gives you an introduction to the system basics before going into the range of functions offered by EPLAN Electric P8. This book covers topics such as project settings and various user settings, the graphical editor (GED), using navigators, creating reports, parts management, message management, revision management, importing and exporting project data, printing, data backup, editing master data and importing old EPLAN data. It also covers add-ons such as the EPLAN Data Portal. Numerous examples show you the many ways you can use EPLAN Electric P8 and give you ideas of how to best solve everyday tasks. Practical information, such as a step-by-step procedure for creating schematic projects and a chapter with FAQs, is also included. New topics covering Version 2.5 have also been added to this edition such as enhanced terminal functionality, improved structure management, user configurable properties as well as new reporting capabilities. The creation, management and use of macro projects is also covered in this book. The examples used in the book are available online as an EPLAN Electric P8 project.

The classic, bestselling reference on architecture now revised and expanded! An essential one-volume reference of architectural topics using Francis D.K. Ching's signature presentation. It is the only dictionary that provides concise, accurate definitions illustrated with finely detailed, hand-rendered drawings. From Arch to Wood, every concept, technology, material and detail important to architects and designers are presented in Ching's unique style. Combining text and drawing, each term is given a minimum double-page spread on large format trim size, so that the term can be comprehensively explored, graphically showing relations between concepts and sub-terms A comprehensive index permits the reader to locate any important word in the text. This long-awaited revision brings the latest concepts and technology of 21st century architecture, design and construction to this classic reference work It is sure to be by the side of and used by any serious architect or designer, students of architecture, interior designers, and those in construction.

" Mr. Minsky long argued markets were crisis prone. His 'moment' has arrived. " -The Wall Street Journal In his seminal work, Minsky presents his groundbreaking financial theory of investment, one that is startlingly relevant today. He explains why the American economy has experienced periods of debilitating inflation, rising unemployment, and marked slowdowns-and why the economy is now undergoing a credit crisis that he foresaw. Stabilizing an Unstable Economy covers: The natural inclination of complex, capitalist economies toward instability Booms and busts as unavoidable results of high-risk lending practices " Speculative finance " and its effect on investment and asset prices Government's role in bolstering consumption during times of high unemployment The need to increase Federal Reserve oversight of banks Henry Kaufman, president, Henry Kaufman & Company, Inc., places Minsky's prescient ideas in the context of today's financial markets and institutions in a fascinating new preface. Two of Minsky's colleagues, Dimitri B. Papadimitriou, Ph.D. and president, The Levy Economics Institute of Bard College, and L. Randall Wray, Ph.D. and a senior scholar at the Institute, also weigh in on Minsky's present relevance in today's economic scene in a new introduction. A surge of interest in and respect for Hyman Minsky's ideas pervades Wall Street, as top economic thinkers and financial writers have started using the phrase " Minsky moment " to describe America's turbulent economy. There has never been a more appropriate time to read this classic of economic theory.

Most major measures wind their way through the contemporary Congress in what Barbara Sinclair has dubbed " unorthodox lawmaking. " In this much-anticipated Fifth Edition of Unorthodox Lawmaking, Sinclair explores the full range of special procedures and processes that make up Congress ' s work, as well as the reasons these unconventional routes evolved. The author introduces students to the intricacies of Congress and provides the tools to assess the relative successes and limitations of the institution. This dramatically updated revision incorporates a wealth of new cases and examples to illustrate the changes occurring in congressional process. Two entirely new case study chapters—on the 2013 government shutdown and the 2015 reauthorization of the Patriot Act—highlight Sinclair ' s fresh analysis and the book is now introduced by a new foreword from noted scholar and teacher, Bruce I. Oppenheimer, reflecting on this book and Barbara Sinclair ' s significant mark on the study of Congress.

Fourteen authors, including many of the best-known scholars in the field, explore how people actually experience their culture and how those experiences are expressed in forms as varied as narrative, literary work, theater, carnival, ritual, reminiscence, and life review. Their studies will be of special interest for anyone working in anthropological theory, symbolic anthropology, and contemporary social and cultural anthropology, and useful as well for other social scientists, folklorists, literary theorists, and philosophers.

This volume consists of papers derived from the Ninth International Conference on Studies in Economic Ethics and Philosophy (SEEP), held at Trent University in Peterborough, Ontario, Canada, in June of 2002. Let me take this opportunity to express my appreciation to Professor Peter Koslowski for his original stimulus, encouragement, and continual assistance in making the Conference a success. I would also like to thank my Trent colleague, Professor David Holdsworth, for his steadfast help in the management of the Conference and the papers resulting from it. I am obliged to Mr. Louis Taylor of North George Studios in Peterborough for his expert professional service in preparing the manuscript for printing. Finally, let me gratefully acknowledge the generous financial sponsorship of the Conference by the Social Sciences and Humanities Research Council of Canada, and Trent University's Department of Philosophy and Graduate Centre for the Study of Theory, Culture, and Politics.
