Therapist Empathy Predicts Success in Psychotherapy

Put simply, empathy refers to understanding what another person is experiencing or trying to express. Therapist empathy has a long history as a hypothesized key change process in psychotherapy. We begin by discussing definitional issues and presenting an integrative definition.

Therapist Empathy and Client Outcome: An Updated Meta-analysis

While empathy is important in psychoanalytic, self-psychological, and client-centered therapies, its primary function is seen as different in each. For client-centered therapy, the major function of empathy is to create a certain kind of learning experience through which clients come to live and relate to themselves differently.

Empathy in Client-Centered Therapy: A Contrast with ...

Empathy is a robust, medium-sized predictor of psychotherapy outcomes, an association evident across theoretical orientations, treatment formats, and client problems. This repeated finding emerging from now over 80 studies and multiple meta-analyses supports a series of clinical recommendations:

Therapist empathy and client outcome: an updated meta-analysis

Empathy is an important human emotion that can greatly benefit clients in therapy and may potentially benefit therapists as well. Demonstrating empathy is something that therapists can consciously do, and there are also ways that therapists can increase their own levels of empathy so that it comes more naturally during sessions.

Understanding Empathy: What is it and Why is it Important ...

In empathic attunement, one tries to respond to the client's perception of reality at that moment, as opposed to one's own or some 'objective' or external view of what is real. The therapist takes in and tastes the client's intentions, feelings, and perceptions, developing a feel of what it is like to be the client at that moment.

Empathizing and Attuning | Relational Integrative ...

Empathy in counselling is about the counsellor seeing the client's world as they see it. Empathy is to respectfully perceive what the client is bringing from their frame of reference and to communicate that back in a way that makes the client feel they've been understood.
