A 30 60 90

triangle is a special type of right triangle.

What is special about 30 60 90 triangles is that the sides of the 30 60 90 triangle always have the same ratio.

Therefore, if we

Access PDF

Geometry

are given one side we are able to easily find the other sides using the ratio of $1:2:\text{square root of three}$. This special type of right triangle is similar to the $45\ 45\ 90$ triangle.
