Gnome Monosoupape. A 1917 Gnome 9N 160 hp Monosoupape rotary engine, with dual ignition provision. Diameter is 95cm (37.4 in) The Monosoupape ( French for single-valve ), was a rotary engine design first introduced in 1913 by Gnome Engine Company (renamed Gnome et Rhône in 1915). It used a clever arrangement of internal transfer ports and a single pushrod-operated exhaust valve to replace the many moving parts found on more conventional rotary engines, and made the Monosoupape engines some ...

Rotary/Gnome engines are a type of internal combustion engines usually designed with an odd number of cylinders in a radial configuration. Unlike the inline engines used in automobiles & motorcycles, the piston-cylinder arrangement in radial configuration are different. In this config, the piston in the cylinders reciprocate outward from the central crankcase.

Locating plans or enough reference to build decent copies of WW1 aircraft is hard enough, but it's even more frustrating if the information exists but the correct engine doesn't. Sometimes it means that a more recent engine is substituted. This can be a good solution if you want to end up with an aircraft that is reliable and can be maintained without too much trouble.

Gnome et Rhône was a major French aircraft engine manufacturer. Between 1914 and 1918 they produced 25,000 of their 9-cylinder Delta and Le Rhône 110 hp rotary designs, while another 75,000 were produced by various licensees. These engines powered the majority of aircraft in the first half of the war, both Allied designs as well as German examples produced by Motorenfabrik Oberursel. In the post-war era they started a new design series originally based on the Bristol Jupiter, but evolving ...

The rotary engine—sometimes called a radial rotary to distinguish it from modern rotaries like the Wankel—is among the strangest internal combustion engines ever conceived. At a superficial glance, a rotary looks much like a radial engine as commonly used in piston-era aircraft, with the same starfish-like cylinder layout, but there's an important difference.
