Professor Stephen Hawking 's final theory on the origin of the universe, which he worked on in collaboration with Professor Thomas Hertog from KU Leuven, has been published today in the Journal of High Energy Physics. The theory, which was submitted for publication before Hawking 's death earlier this year, is based on string theory and predicts the universe is finite and far simpler than many current theories about the big bang say.

In the 1960s, Hawking and the Oxford University physicist Roger Penrose proved that when space-time bends steeply enough, such as inside a black hole or perhaps during the Big Bang, it inevitably collapses, curving infinitely steeply toward a singularity, where Einstein 's equations break down and a new, quantum theory of gravity is needed.
