The central theme of  
Introduction to Electric

that electric circuits  
are part of the basic  
fabric of modern

In Simple terms an  
electronic circuit is a  
closed pathway for  
electrons to flow. The  
Electric Current in a  
circuit flows from  
positive to negative

while electrons flow from negative to positive. So when the switch is on the path is complete and electricity passes through enabling the bulb to light up, while when the switch is not on, there is a break in the flow of electricity and the bulb does not light up.
