ISO 13732-2 deals also with discomfort. This part of ISO 13732 does not provide burn data on the skin that comes into contact with liquids or gases. NOTE With the exception of water there are no such data available up to now. For water and liquids with similar heat capacity and heat flow properties burn threshold values for bare metals can be chosen. 1 Scope. This part of ISO 13732 provides ...

ISO 13732-1:2006(en), Ergonomics of the thermal ...

ISO 13732-1:2006 deals with contact periods of 0,5 s and longer. It is applicable to contact when the surface temperature is essentially maintained during the contact. It is not applicable if a large area of the skin (approximately 10 % or more of the skin of the whole body) can be in contact with the hot surface.

ISO 13732-1 September 1, 2006 Ergonomics of the thermal environment Methods for the assessment of human responses to contact with surfaces Part 1: Hot surfaces This part of ISO 13732 provides temperature threshold values for burns that occur when human skin is in contact with a hot solid surface.

ISO 13732-1 - Ergonomics of the thermal environment ...

ISO 13732-3:2005 provides methods for the assessment of the risk of cold injury and other adverse effects when a cold surface is touched by bare-hand/finger skin. It provides ergonomics data for establishing temperature limit values for cold solid surfaces. The values established can be used in the development of special standards, where surface temperature limit values are required. Its data ...
