File Size: 969 KB. As a real-time application, Lync Server 2013 requires careful planning when deployed on virtual environments. Performance issues caused by shared resource constraints are hardly noticeable in many applications, but in Lync Server they can cause audio and video issues that make for poor user experience. This paper provides many configuration recommendations for running Lync Server 2013 in a virtual environment, both for the host servers and the guest servers.
