The Forecasting Problem

Chapter 8 Case Study

Teaching Notes Introduction

Northcutt Bikes is a relatively basic forecasting situation. While the major thrust of the case is a quantitative analysis of the demand data in the case, it also provides an opportunity to discuss with students the issues of applying forecasting solutions in a growing company, and in particular how the quantitative analysis of the forecasting data can be use in ...

Another possible solution is that Northcutt Bikes could develop an information system that helps retail business divide the safety stocks of these items among themselves. To be specific, through sharing inventory information to retail business, Northcutt Bikes still owns controlling inventory management, including inventory types, quantity and timing of orders, and inventory ownership still belongs Northcutt Bikes.
