Manual of Minor Oral Surgery for the General Dentist ...

Oral surgery is most often performed on an outpatient basis and usually involves either a general or local anesthetic. From a patient perspective, oral surgeries should be approached in the same way as any other surgery. You need to make many of the same preparations and follow post-operative instructions to avoid the risk of infection.

How to Prepare for Oral Surgery - Verywell Health

Oral surgery is often performed in a dental office setting, under local anesthesia, with minimal recovery time. Oral Surgery can range from routine procedures such as tooth extractions and implant placement to more complex jaw realignment surgeries and emergency care for facial trauma.
