The basic idea behind

Read Book Pir Sensor Arduino

this project is that all the bodies generate some heat energy in the form of infrared which is invisible to human eyes. But, it can be detected by electronic motion sensor. The project involves the use of Arduino, motion sensor, buzzer, LCD display and a simple program.

PIR Sensor — is the heart

Read Book Pir Sensor Arduino

of this simple burglar alarm circuit using arduino. A PIR sensor — is basically a motion sensor or a motion detector which identifies any object that moves inside its range of view. PIR sensor identifies infra red radiations emitted by any object under its radar range.
