Fully comprehensive with many illustrations - owners' workshop manual for the 90,110 Defender petrol and diesel engines from 1983-on.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Transhumanists would have humanity's creation of posthumanity be our governing aim. Susan B. Levin challenges their overarching commitments regarding the mind, brain, ethics, liberal democracy, knowledge, and reality. Her critique unmask their notion of humanity's self-transcendence via science and technology as pure, albeit seductive, fantasy.

This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom

'A band of stubborn pioneers rose from the embers of Britain's cities after World War Two and created the finest automobiles the world had ever seen ... High Performance tells the exhilarating tale of their journey down the fast lane.' Ben Collins, bestselling author of *The Man In The White Suit* and *How To Drive* 'A wonderful glimpse "backstage" at the flamboyant mavericks and crazies who populated the British motor industry in the 60s.' Alexei Sayle 'High Performance is a cracking read and an adrenaline-packed tribute to the time when British mavericks "blew the bloody doors off" the competition.' *The Sunday Times* 'Peter Grimdsdale gives a very different and uplifting slant to the story of ... the post-Second World War British Motor industry. He focuses on people who did things differently and whose achievements are with us still ... thoughtful and stimulating.' Alan Judd, *The Oldie* Chosen as one of *The Mail on Sunday's* '100 Summer Books'? In January 1964 a team of tiny red and white Mini Coopers stunned the world by winning the legendary Monte Carlo Rally. It was a stellar year for British cars that culminated in Goldfinger breaking box office records and making James Bond's Aston Martin DB5 the world's most famous sports car. By the sixties, on road, track and silver screen the Brits were the ones to beat, winning championships and capturing hearts. Stirling Moss, Jim Clark and Paddy Hopkirk

were household names who drove the sexiest and most innovative cars. Designers like John Cooper, and Colin Chapman of Lotus, dismissed as mere 'garagisti' by Enzo Ferrari, blew the doors off Formula One and grabbed all the prizes, while Alex Issigonis won a knighthood for his revolutionary Mini. The E Type Jaguar was feted as the world's sexiest car and Land Rover the most durable. But before the Second World War only one British car had triumphed in a Grand Prix; Britain's car builders were fiercely risk-averse. So what changed? To find out, Peter Grimsdale has gone in search of a generation of rebel creative spirits who emerged from railway arches and Nissen huts to tear up the rulebook with their revolutionary machines. Like the serial fugitives from the POW camps, they thrived on adversity, improvisation and sheer obstinate determination. Blazing the trail for them was William Lyons, whose heart-stoppingly glamorous and uncompromising Jaguars propelled a bruised and bankrupt nation out of the shadows of war, winning the fans in Hollywood and beating 'those bloody red cars' at Le Mans. High Performance celebrates Britain's automotive golden age and the mavericks who sketched them on the back of envelopes and garage floors, who fettled, bolted and welded them together and hammered the competition in the showroom, on the road and on the track - fuelled by contempt for convention.

A laboratory study that investigates how algorithms come into existence. Algorithms--often associated with the terms big data, machine learning, or artificial intelligence--underlie the technologies we use every day, and disputes over the consequences, actual or potential, of new algorithms arise regularly. In this book, Florian Jatton offers a new way to study computerized methods, providing an account of where algorithms come from and how they are constituted, investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled.

In 1998 the author, a professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.
