Introduction to RF Engineering

RF engineering basic concepts: Sparameters. F. Caspers. CERN, Geneva, Switzerland. Abstract. The concept of describing RF circuits in terms of waves is discussed and the S-matrix and related matrices are defined. The signal flow graph (SFG) is introduced as a graphical means to visualize how waves propagate in an RF network. The properties of the most relevant passive RF devices (hybrids, couplers, nonreciprocal elements, etc.) are delineated and the corresponding S-parameters are given.
