A division ring, also called a skew field, is a ring in which division is possible. Specifically, it is a nonzero ring in which every nonzero element a has a multiplicative inverse, i.e., an element x with $a \cdot x = x \cdot a = 1$. Stated differently, a ring is a division ring if

and only if the group of units equals the set of all nonzero elements.

A division ring is a type of noncommutative ring under the looser definition where noncommutative ring refers to rings which are not ...
