Glazing. Glazing is a technique in which a transparent, thin or darker paint layer is applied over dry paint. The technique is especially used to intensify the shadows and modulate color. The paints used for this process must be transparent in nature and can be applied to the entire painting or some parts of it.

A Step-by-Step Tutorial for Conducting Sentiment Analysis. ... The first step of preprocessing text data is to break every sentence into individual words, which is called tokenization. Taking individual words rather than sentences breaks down the connections between words. However, it is a common method used to analyze large sets of text data.

Step By Step Directions: 1. Lay your canvases vertically then apply painters tape. These directions are the same for both of your paintings. The only thing you will do different is put your paintings together so the moon and reflection match up. Your line should be approximately 4" up. This line that you are blocking off will be our "horizon line".
