Ah, The LaTeX Companion is usually referred tenderly as TLC. At the risk of being heretic, in my humble opinion this is the Holy TeX Trinity for me: The TeXbook, The LaTeX Companion and TeX by Topic. My favourite, of course, is TLC for obvious reasons: it saved me a lot of times. It was really a friend, a companion.

I assume (not that they tell authors anything) that the "2nd edition" here refers to the second edition of the latex companion. The 2nd edition (compass book) is much expanded from the first edition (the dog book) and has different set of authors (I wasn't an author of the 1st edition) 1st edition came out around the time of latex2e in 1994 I think, and the second edition was published around ...

This book, The LaTeX Companion, is packed with information needed to use LaTeX even more productively. It is a true companion to Leslie Lamport's original user's guide book, LaTeX: A Document Preparation System, now in its second edition, and indeed, it is a valuable complement to any LaTeX introduction.

The LaTeX Companion is something between an advanced course tutorial (could just as well be named Selected Chapters from LaTeX) and a reference book. None of them was ever aimed at beginners, and this one is no exception. LaTeX comes with a rich legacy of add-on macro packages doing various useful and nifty things with lists, floats, tables ...
