pcb2gcode [options]. DESCRIPTION. This manual page documents briefly the pcb2gcode command.. pcb2gcode is a program that takes the files typically produced by PCB (printed circuit board) designing tools, in particular Gerber (RS-274X) and Excellon (an RS-274C variant) files as parsed by gerbv, and produces files that ...

## **Circuit Board Builder: Eagle Pcb Gcode Setup**

PCB-GCODE is specifically designed to convert an Eagle PCB design into GCODE for isolation routing. It is written and maintained by John Johnson. [www.pcbgcode.org/](http://www.pcbgcode.org/)  
[groups.yahoo.com/group/pcb-gcode](http://groups.yahoo.com/group/pcb-gcode). Design your board in Eagle; Convert to GCODE with PCB-GCODE; Run GCODE through an autoleveller; Mill your PCB; Of course, there are a lot of 'sub steps'.

pcb-gcode-3.3.2.zip by admin. Now much easier to use! Pcb-gcode creates g-code files to allow you to produce a printed circuit board using a CNC router or milling machine.

Supports outlining tracks (mech. etching), drilling and milling. Removes slivers by offsetting outline passes. Includes a setup screen that eliminates editing config files.
