Music is a widely enjoyed human experience. It is, therefore, natural that we have wanted to describe, document, analyse and, somehow, grasp it in language. This book surveys a representative selection of musical concepts in Chinese language, i.e. words that describe, or refer to, aspects of Chinese music. Important as these musical concepts are in the language, they have been in wide circulation since ancient times without being subjected to any serious semantic analysis.

Aesthetic principles and extramusical associations. Despite the controversial authenticity and dates of ancient Chinese written sources, a combined study of them produces tantalizing images of courtly parties, military parades, and folk festivals, but it does not provide a single note of music. Nevertheless, in keeping with the prehistoric traditions of China, the philosophies of sages, such ...

Chinese Music. Throughout the long history of China, the Chinese people have been creating music that is attuned to their complex cultural needs. In the developmental process, Chinese music has profoundly influenced adjoining regions, while in turn absorbing musical elements from neighbors. We will explore this musical history and development, instruments and genres, regional variations and contemporary Chinese music.
